

## Profile

Technical magician I love being at the center of all events. I am able to find scalable, elegant and sustainable solutions to complex networking problems. I constantly achieve the best results in everything I do. As a trusted member of staff, I am regularly brought up to meet with senior client staff to define their business needs. At the present time, although I practiced all engineering works in all disciplines, architectural, civil and space engineering, and I have accomplishments, works and designs implemented on the ground

# OSAMA LAITH ZAIDAN

## Networks Engineer

## Award

AUTOCAD	★★★★★
WEB DESIGN	★★★★
SKETCHUP	★★★★★
TOTAL STATION	★★★★★
3D'MAX	★★★★★
ADOBE APP.	★★★★★

## Education

2005-2008 **High School Diploma**  
**AL-Khadraa HIGH SCHOOL**  
I studied at Al-Khadra Secondary School for Boys from 2005 to 2008

2008-2012 **Computer Engineering**  
**European University - Syria**  
I studied the College of Engineering at the European University, Department of Computers, in the Syrian capital, Damascus

2017-2021 **Networks Engineering**  
**AL-IRAQIA UNIVERSITY**  
I studied the College of Engineering at the AL-IRAQIA University, Department of Networks

## Language

50%

English

France

## Work Experience

### Site Engineer

2012-2015

### AyadiGroup For Real Estate

I carried out and supervised engineering on building and construction works in Al-Ayadi residential complex for two years and supervised the construction of 10 buildings out of 37 buildings in addition to the commercial market and schools

### Architect

2015-2017

### AyadiGroup For Real Estate

I drew, modeled and designed all related work in the company and designed and drew several other projects, including those implemented on the ground

### It Manager

2017-2021

### AyadiGroup For Real Estate

I headed the communications, internet and networks division of the company and became at the core of an engineering specialist, establishing the first optical cable network project in the country with international specifications and systems not previously implemented in the country at a lower cost and in record time. I also created a secondary information technology company and managed all Internet services

## Skills

- Skilled in network Configurations ( CCNA ) To do routing and switching on network networking devices.
- Skilled in network Configurations ( MTCNA ) to do routing and switching on networking devices
- Skilled in system design on the optical networking and have certification in optical network Engineer ( CONE ) this help me determine how higher speed transmission requirements can be met by the systems I design.
- Skilled in working on all devices in Fiber optical Splicier, OTDR, PowerMeter and configuration all devices in EPON and Gepon System type.
- Skilled in communication engineering including wireless networking.
- Knowledge in many programming languages python, java, c++
- Skilled in AutoCad, 3d max, and mapping design
- Skilled in all Adobe Applications.
- Skilled in Microsoft office
- Skilled in configuration ESXI and windows server.
